## Directory Updated

I have included all the updates sent to date. (Thanks to all those who took the time) I also went in and made all the e-mail addresses hot links in the PDF format posted on the web. (probably won't be posted until next week) Due to the labor intensity of this only the complete directory will have this. The Command directories are not updated but will be next week (Week of 27 Dec) as well as making the Allergy Region button hot.

## News From the Walter Reed Mixing Lab

When ordering refills from WRAMC mixing lab it is very important to include the facility to be billed. It is usually your Regional Facility. In order to receive extract from WRAMC Mixing Lab there must be a contract established. The cost for a kit from WRAMC is about \$30.00. A lot more to come on the ins and outs of obtaining and maintaining extract from this lab. A meeting with Col Freeman, SG Advisor in A/I issues is tentative for the second week in Jan 00.

## Distance Learning Module Update

The Distance Learning package is being Beta tested at two facilities. The final version is done and pending final review. It will be released in 00. It may be a web site posting, this has yet to be determined. Once it is posted I strongly encourage you to print a copy. [I will seek authorization to distribute it] This is the tool to expedite assistance in your clinic and to deepen the resource pool within your MTF. The degree of success of this effort will hinge on the support you give it. This is one of many steps in the works of easing the strain of the current operational workload.

## On a Personal Note

I sincerely hope that all have a great holiday and use the time to recharge, reassess and prepare for the challenges ahead. Thank you for your hard work, tireless efforts and ability to do the impossible. The world is truly a healthier place to live thanks to your efforts! Be safe, be happy and don't ever sweat the small stuff.

"Attention to detail is a key to success, is it on your key chain?"
